

## News Release

### NETGEAR Offers ReadyNAS Duo Customers Free 500GB Hard Drive

*Leading networking and storage vendor, NETGEAR, is offering a promotion entitling customers to a free 500GB hard drive when purchasing a ReadyNAS Duo (RND2000).*

The ReadyNAS Duo is a powerful and versatile network storage device for home and small office environments. With excellent media streaming capabilities and capacity to hold two hot-swap drives, it is truly the heart of the digital home. It is built in a sturdy steel housing and backed by an industry-leading, three-year warranty. NETGEAR's ReadyNAS family of products enable users to securely store, share and protect files across a LAN or WAN, guard against disk failures, and grow capacity on the fly.

Mark Power, Managing Director, NETGEAR UK and Ireland, commented: "We are always eager to provide consumers and businesses with products and services that lie within their budgets. By offering customers a free 500GB hard drive with the purchase of a ReadyNAS Duo, we hope to encourage the practise of sharing and protecting data in a reliable and secure manner."

"We chose to run this promotion alongside the ReadyNAS Duo following its recent exemplary performance, having received recognised accolades from publications such as TrustedReviews and Personal Computer World. We hope our customers' experiences are equally positive – made even more successful by the financial benefits of a free hard drive."

This offer is part of NETGEAR's move to help consumers make savings, whilst capturing a larger share of the UK storage market. The offer also reflects NETGEAR's commitment to enabling its partners to sell products more easily in the tough economic climate.

This promotion is effective immediately and will run until June 30th, 2009. The claim form can be downloaded at <http://www.netgear.co.uk/free500gbdrive.php>.
